

Dear FCC,

I have listened to XM satellite radio with traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. It should not be up to the National Association of Broadcasters to dictate what people are permitted to hear. I urge the FCC to reject the NAB's petition 04-160 and I support XM's ability to provide their kind of programming.

Satellite Radio has made driving safer since people do not have to constantly switch stations while traveling.
